The highlights at a glance

BRUCK OVAL Canopy

 The BRUCK OVAL canopy transforms a single ceiling outlet into an elegant lighting

feature
and enables atmospheric
room lighting with just one
power connection.

🔍 Multiple pendant lights at
different heights
create depth, warmth and a
cozy, modern atmosphere.

🔍 The canopy creates multiple
freely placeable lighting
points
above the dining table, in the
kitchen, living room or
staircase.

🔍 Compatible with BRUCK
pendant lights and many
other brands:
Lights with an open cable end
can easily be integrated –
suitable for 230 V and 350
mA.

🔍 Manufactured in Herne:
timeless design, precise
craftsmanship and durable
lighting technology.

🔍 Thoughtful installation for
easy setup:
Mount the ceiling plate, attach
the cover plate, install the
lights at your own pace –
magnets ensure a secure and
flush finish.

When light becomes part of
your interior

Bring the cozy atmosphere of
a design hotel into your home
– with the BRUCK OVAL
canopy.

It transforms your ceiling
outlet into a small piece of
light art: multiple pendant
lights, arranged lightly and

floating, at different heights.
This creates three-dimensional, inviting light that brings warmth, depth and ambiance to any room.

A canopy that brings your rooms to life

You may know this situation: Only one power outlet on the ceiling, but the desire for more ambiance – above the dining table, next to the sofa, in staircases or hallways with high ceilings.

The OVAL canopy is the solution: It can be mounted on a single ceiling outlet and transforms it into multiple freely arranged lighting points. Pendant lights at different heights create movement and character – like in a stylish hotel, only more personal.

A new take on canopies – for free light design

Whether you use BRUCK pendant lights or luminaires from other brands – the OVAL canopy remains open to your ideas.

Lights with open cable ends can easily be integrated. And whether your light operates on high voltage (230 V) or low voltage (350 mA) – the canopy is prepared.

From Herne to the world – design that lasts

The OVAL canopy combines timeless elegance, skilled craftsmanship and modern lighting technology.

The canopy is manufactured in Herne, at the BRUCK site in Germany. Each product is created here with care, experience and attention to detail – by people who love light.

A canopy like in a design hotel
– only more personal

The OVAL canopy is ideal for
those who want more than
just lighting.

Above the dining table, in the
living room, above a sideboard
or in staircases, it creates light
that radiates warmth and
comfort. Pendant lights at
different heights add depth
and movement to your living
space.

Easy to install. Smartly
designed – the oval BRUCK
canopy

Installation is as clever as the
design itself:

First, mount the ceiling plate
with electrical connections,
the uniquely simple
suspension for the pendant
lights and, if needed, the
drivers.

In the second step, the large
cover plate is hooked onto the
three elastic cords of the
ceiling plate. This allows each
luminaire to be installed
calmly in the third step.

The open cable end is guided
through the designated holes
in the cover plate and
attached to the strain relief.
Then the strain relief only
needs to be hooked onto the
ceiling plate, and the open
cable ends inserted into the
corresponding terminal.

After that, the plate is lifted –
and magnets ensure a secure,
flush fit on the ceiling.
